**Conclusion:** Application is free from OWASP ASVS (any other known) vulnerabilities and is safe for hosting.

**Recommendation:**

- Enforce secure communication using HTTPS and implement certificate pinning for enhanced security.
- Web server and OS Level hardening need to be in place for the production server.
- The Application may be considered safe for hosting with read only permissions.

**Note:** The certificate is valid till no additional changes in the source code are carried out or one year from the date of issue, whichever is earlier.
